

COA PROJECT PRESENTATION

Smart Medicine Reminder System using Arduino

A Smart Healthcare Solution for Timely Medication

Why Is This Device Needed?

The Core Problem

Many people forget to take their medicines on time, especially older people. This can make their health worse.

⚠ Missing medicines or taking the wrong one can be dangerous and delay recovery.

Memory Problem

Old people often forget when to take medicines.

Too Many Medicines

Different medicines at different times can confuse patients.

No 24/7 Caregiver

Family and nurses cannot always be physically present

What is This Project & How It Helps

What is it?

This is a small electronic device that reminds people to take their medicines on time automatically. No need for someone to remind them again and again.

Audio-Visual Alerts:

The device gives a buzzer sound and light to alert the patient when it's time to take medicine.

Easy Instructions:

The screen clearly shows which medicine to take (like "Take Tablet 1").

Confirmation System:

The alarm keeps ringing until the user presses a button, so the medicine is not missed.

HARDWARE COMPONENTS

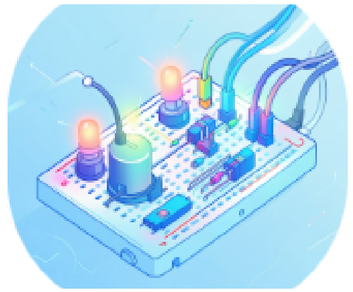

Arduino Board:
The processing "brain" — runs all code and controls every component

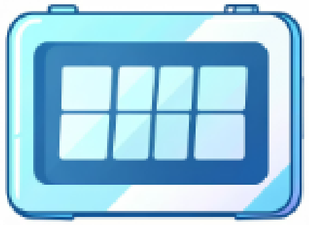

RTC Module
Keeps accurate time even when power is switched off

Buzzer & LEDs
Audible alarm and flashing lights to attract immediate attention

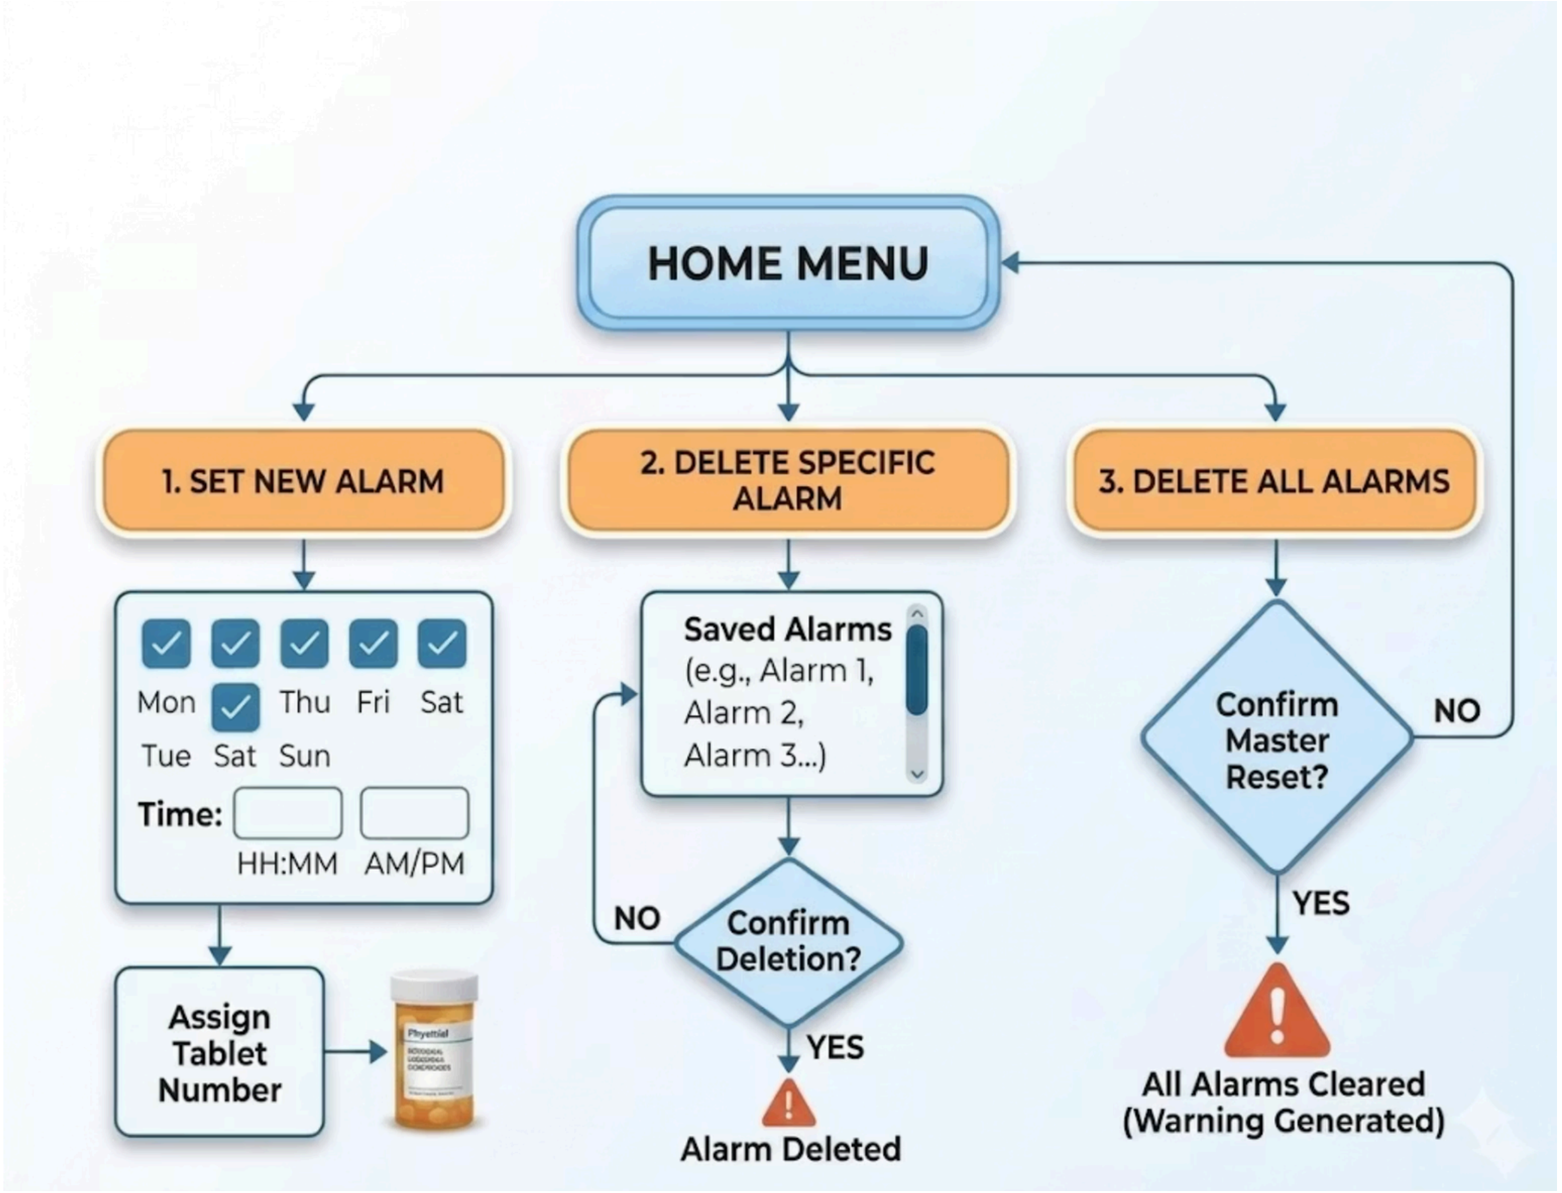

Push Buttons
Used to set alarms and confirm that medicine has been taken

LCD Screen
Shows current time and medication instructions to the patient

How the System Works (User Flow)

Home Menu Options:

1 Set New Alarm
User selects day & time and sets medicine reminder.

2 Delete Alarm
User can remove a selected alarm from saved alarms.

3 Delete All Alarms
User can clear all alarms after confirmation.

Future Scope & Benefits

📱 Mobile App Integration

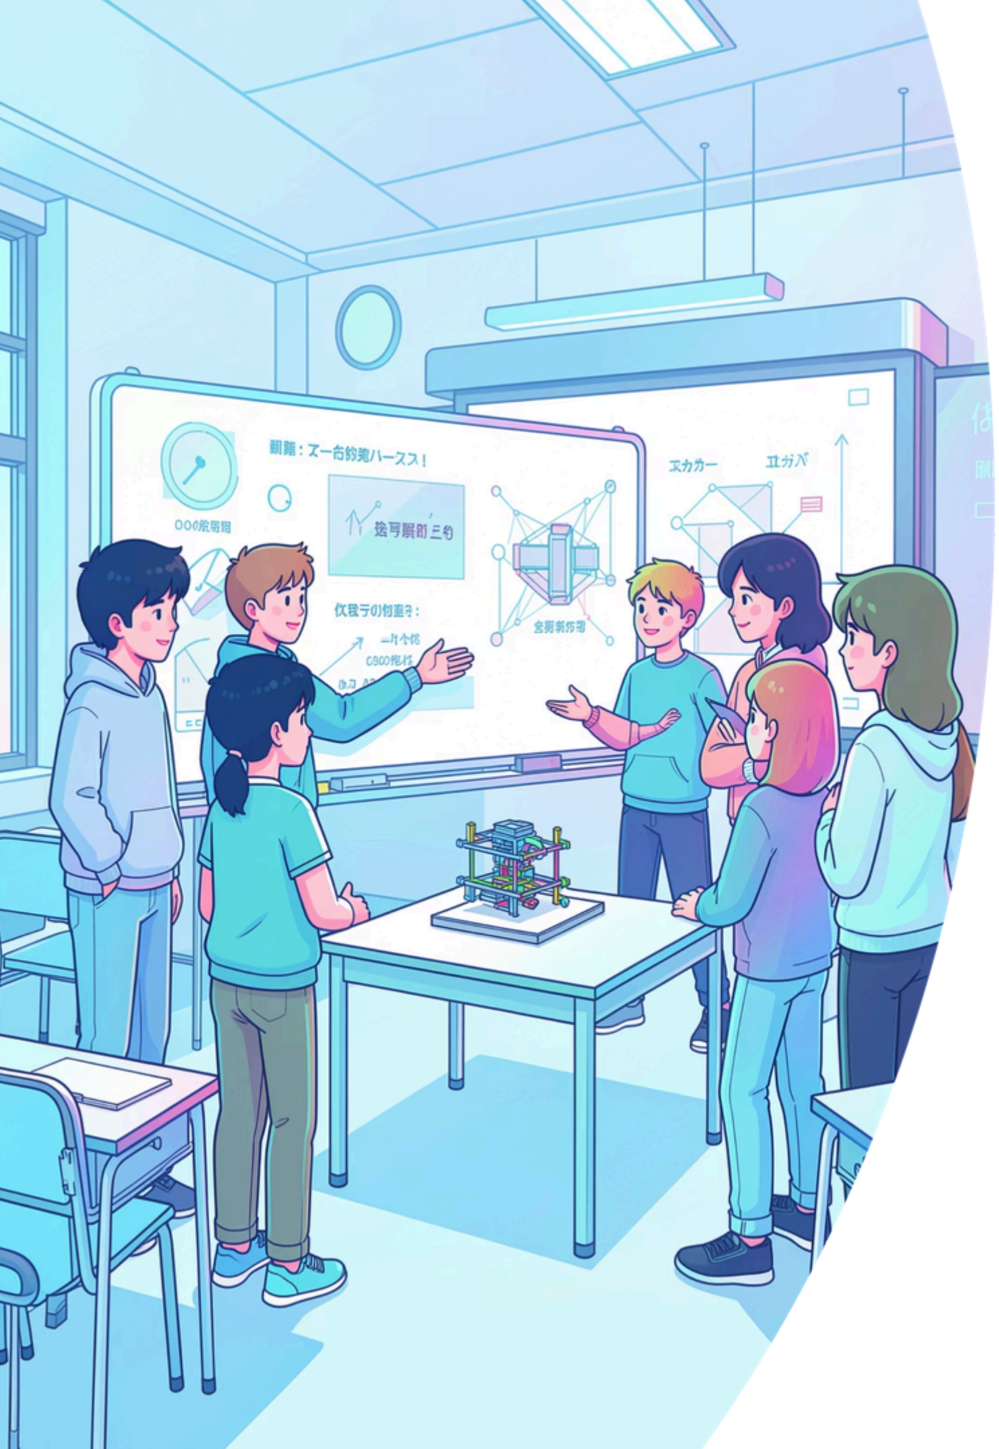

In future, it can connect with phone using Bluetooth/WiFi to control reminders.

🔧 Easy to Build

Uses simple and low-cost components, wasy to repair and maintain.

💰 Affordable & Useful

Low cost compared to other devices, good for home healthcare use.

Thank You!
